You may view TCCSA videos for free and may subscribe to TCCSA Channel for free

YouTube will recommend other channels to you but you need not subscribe to them!

**Lee Michaels Live has interviews of some of our
speakers.**

May 19, 2020, online before 7:30 pm,

Go to www.tccsa.tc

And click on link to YouTube and find May 2020 Meeting

Or go to [YouTube.com](https://www.youtube.com) and search for TCCSA

"Worldwide Erosion Negates Evolution's Deep Time".... Sal Giardina

Rates of erosion are known and the earth's crust above sea level should be eroded flat within 10 million years at present rates of erosion. Even if the crust is rising in some areas, there are sedimentary layers reputed to be hundreds of millions of years lying on top. This is not compatible with the current theories of earth history.
